**Text 1****Mediterranean Cuisine: A Shared History of Interaction**

Unlike many other ethnic cuisines, Mediterranean cuisine is not the product of a specific ethnic group or culture. Rather, it is a label referring to the culinary trends shared by a diverse array of peoples that live in the region around the Mediterranean Sea.

While Mediterranean cuisine is understood to be a unified culinary tradition, in reality, there is a vast amount of cultural variance in the cooking found in this geographic region. Although Mediterranean cuisine isn't governed by a single culture, it is very much the product of cultural influence and exchange. The world's earliest civilizations bordered the Mediterranean Sea, their development bolstered by the rich soil and temperate climate that made agricultural production thrive. As the point of intersection between Asia, Europe, and Africa, with major civilizations located in each area, the Mediterranean was geographically destined to become a major trading hub. Traders exchanged cultural **commodities** like spices and other food goods, resulting in the wide dissemination of certain ingredients throughout the cuisines of these disparate peoples. It was through this form of cultural interaction that certain fundamental elements of Mediterranean cuisine became popular throughout the region.

The overarching characteristics of Mediterranean cuisine are largely shaped by the climate and geography of the region. The sunny, mild Mediterranean climate yields an agricultural **bounty** that heavily influences the vegetable-dominant cuisines of the region. The most universally used and prevalent ingredient in the cuisines of the Mediterranean is olive oil. Olive trees are prevalent throughout the region, and the distinctive oil is a major export of many Mediterranean countries. The pungent, sometimes bitter oil works its way into a variety of dishes, and is used both as a cooking agent and a dressing. Olives themselves are a regular ingredient in Mediterranean cuisine, adding a punchy, fermented, acidity to dishes. Fresh vegetables dominate Mediterranean cuisine, with a wide variety taking center stage in dishes throughout the region. While there is some cultural variation, eggplant, artichokes, squash, tomatoes, legumes, onions, mushrooms, okra, cucumbers, and a variety of greens and lettuces all flourish in this region and are commonly used. Vegetables appear in dishes in a variety of forms: baked, roasted, sautéed, grilled, puréed, and served fresh in salads.

**Conquest** was another factor in shaping Mediterranean cuisines. The different cultures of the Mediterranean came into direct contact as a result of the empire-building efforts of various civilizations. Once one civilization overthrew the government of another, they often imposed their own cultural practices upon the conquered society. At the same time, there was inevitably a certain amount of cultural persistence during conquest, often resulting in the amalgamation of the conquering group's culture with that of the conquered. As societies **blended** together within the empire, culinary practices were adapted and conformed, resulting eventually in the adoption of the current culinary identifiers of the Mediterranean cuisine by people throughout the region.

Meat is generally, on the one hand, used sparingly in Mediterranean cuisine, and, in most of the Mediterranean, tends to be grilled. The Mediterranean's rocky terrain can't typically support larger herding animals like cows, limiting meat options to smaller domesticates like goats, sheep, pigs, and chicken, as well as some wild game. Goat and sheep milk are also used in a variety of Mediterranean dishes, primarily in the forms of yogurt and cheese.

On the other hand, seafood is a more prevalently used protein source, appearing in variety of dishes. The close proximity to the Mediterranean Sea provides easy access to fresh seafood, which makes frequent appearances in dishes throughout the region. A preponderant use of fresh herbs characterizes Mediterranean cuisine. The climate and geography of the region is naturally suited to growing herbaceous plants, both indigenous and imported. While there is some cultural variation in the use of certain herbs, overall the culinary traditions of the Mediterranean use basil, oregano, thyme, rosemary, marjoram, parsley, dill, mint, garlic, tarragon, fennel, cilantro, and saffron.

Ваш ответ частично правильный.

Grading type: Absolute position

Grade details: 3 / 5 = 60%

Here are the scores for each item in this response:

- 1 / 1 = 100%
- 0 / 1 = 0%
- 0 / 1 = 0%
- 1 / 1 = 100%
- 1 / 1 = 100%

Для этих элементов правильный порядок выглядит так:

**Text 2****Planet Pasta**

Pasta, in one form or another, is a component of many cuisines around the world. Even where it is not part of the local cooking tradition, it is still generally available. All the more extraordinary, therefore, that sales of pasta in Britain should have increased 48% between 1991 and 1995, and continue to do so. A similar trend has been registered in France and the USA. Only the Italians, it seems, are consuming less of the stuff. So, what lies behind this trend?

Pasta has become one of the most **ubiquitous** food items in Western culture in recent years. The food's obvious qualities of taste and texture don't fully explain this, however, and I would like to suggest that a number of economic and social factors have played a part. The first and most important of these is the new democracy of the kitchen; the fact that neither meal-times nor the symbolic importance of the dinner table retain their former formality. Pasta is a rough-and-ready, quickly prepared food fix. As it meets with universal favor and takes no great effort, it is available to all, and at any time. One cannot underestimate what this new ease of eating, at any time, under any circumstances means. It means freedom from planning because the ingredients are always available; it means quick and pungent satisfaction of appetite allied with facility; it is uncomplicated.

First, let us consider pasta itself. Apart from putting a slab of meat on a fire, boiling an egg or eating vegetables raw, no dish in the world is much simpler than pasta. It consists of flour, egg and water. It is dropped into boiling water and requires no more skill in cooking than boiling an egg. However, where other staples like rice or bread have survived and are eaten more or less as it is, the almost unique characteristic of pasta is that it is no more than a savory depository for other flavors: those of its innumerable sauces. No one you or I know eats pasta plain. At the very least, we add butter and the Chinese cook it in stock or add **pungent** spices.

This combinatory capacity, of course, is one of the reasons for the ubiquity of pasta. Whatever your most prized and available flavors (fish, meat, fungi or vegetables), they can be combined with pasta, and this factor allowed it to migrate from its original Asian home to Italy, whose main foodstuff it has long been. It also permitted chefs around the world to experiment and invent means by which its flavour could be **enhanced**. Pasta is also cheap, democratic, filling and nutritious. Its carbohydrates provide quickly convertible energy and whatever you add to it simply adds to its nutritional value. Finally, though there are some people who don't eat some of those additional ingredients, you would be hard put to find anyone who doesn't like it.

As the old habits of eating – as a family, with the usual cast of characters, with manners, table settings, etc. have died out under the **exigencies** of modern working hours and the absence of a woman stuck at home preparing food for husband and children, so pasta has advanced alongside, I might add, other quick fixes from the take-away to the stir fry. The influence here is American. It is Americans who invented the whole idea of the meal-on-the move, the drive-in, the fast-food outlet. But if pasta has made great strides in the past few years, it has to be **due to** the emphasis placed on the 'healthy' Mediterranean diet. I can remember, many years ago, that when I reported in the British press that the Italian football team trained on pasta before a big match, I was thought scarcely believable. Pasta was considered a 'heavy' indigestible dish in Britain at that time. It was not long, however, before the skeptics realized that, in fact, we have few such excellent, short-term energy-providers as pasta. It is quickly absorbed, easily digested and gives instant results. In a world increasingly devoted to health and exercise, pasta was a natural.

I like to think, however, that the clinching argument **in favour** of pasta, and the reason why it is the fastest expanding food area in food marketing, is its accessibility. Pasta breaks down the distinction between cooking and eating: it brings out the inventive in even the rankest amateur, since almost anything can be thrown into a pasta sauce; it makes no demands on anyone. Even the most modest cook can produce miraculously good pasta – as it were, by accident. The democracy of pasta is based on the enjoyment factor. If you combine that with the health factor, its accessibility to vegetarians and its low cost, the phenomenon becomes perfectly understandable.

Here is a résumé using information from Text 1. However, it contains some vocabulary, grammar and factual errors. Decide which of the sentences contain an error if any. There can be more than 1 error in a sentence. Some sentences do not have errors at all. If there are no errors in the sentence, choose "0".

Overall the culinary traditions of the Mediterranean use basil, oregan, thyme, rosemary, marjoram, parsley, dill, mint and garlic.

**Write your commentary on the article "Planet Pasta". Your commentary is to be between 180-200 words. You are not allowed to cite from the original text pieces longer than 4 words running. Your text should contain various points of view including your own.**

**To fulfil the task successfully you are:**

- **to briefly convey the content of the article**
- **to mention various/possible views of the issue**

**to divide your text into logically connected paragraphs**

The article considers the role of pasta as one of the most prevalent components of dishes in the modern cuisine. Each of the six paragraphs, apart from the introduction, presents a certain factor which contributed to the international popularity of pasta. First of all, the author rejects the impact of taste of the product itself. Quite logically, they believe the economic and social aspects of the twenty-first century to have contributed the most. Nowadays, we seek practicality in food, which pasta offers in abundance. It can be eaten anywhere at any time. Moreover, even an amateur would face no difficulty when cooking pasta. Pasta is also a very "tolerant" product. It welcomes all your favourite ingredients, be it seafood, vegetables, meat or fungi. If you find it too bland, you can always add any spices you like, and it would only improve the taste. Lastly, pasta is prized for being healthy. It is fast for body to digest, while giving you the necessary energy. Personally, I think the author of the article outlined the factors brilliantly, supporting them with good examples. I can only stress how pasta indeed blends cuisines of various cultures and somehow even unites the world.

Now show how well you know English-speaking countries. Read the article. There are 10 gaps in it. Choose the correct option for each one.

The first important exact date in British history is (54) \_\_\_\_\_, the date of the first invasion of Britain by the Romans. Although Roman forces quickly (55) \_\_\_\_\_, their coming initiated a period in which British Celtic society was radically transformed, first by Roman contact and then, through much of the island, by actual Roman rule. It was also a time when the available evidence for (56) \_\_\_\_\_ history explodes, due to the Roman habit of writing histories and commemorating events through stone inscriptions. The Roman Empire was dramatically expanding in both western Europe and (57) \_\_\_\_\_. Competing Roman generals and (58) \_\_\_\_\_ sought fame and wealth through conquest of weaker peoples. Britain became subject to the attention of the greatest of all Roman generals, (59) \_\_\_\_\_, who had conquered (60) \_\_\_\_\_ in 58 and become proconsul of the province. Given its cultural, political, and economic links with Gaul, Britain was a convenient refuge for some of Caesar's Gaulish enemies, many of whom were identified as Belgae and formed a new ruling class in southern Britain. The (61) \_\_\_\_\_ wealth of Britain also made it a tempting prize. Keenly aware of his own prestige and the glory that extending Roman rule to the edge of the known world would add to his legend, Caesar saw (62) \_\_\_\_\_ as a logical (63) \_\_\_\_\_ to his earlier conquests.

Выберите один ответ:

- a. follow-up
- b. prize
- c. result
- d. retreat

Правильный ответ: follow-up
